Technical Trainings

Metal professions

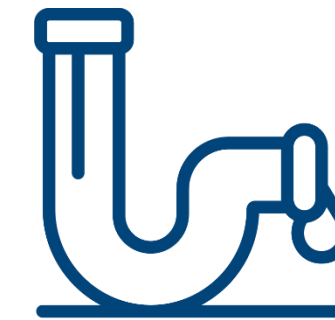

- Structural Steel Technician
- Mechanical Engineering Technician
- Machining Technician
- Metalworker
- Welding Technician
- Production Technician

New

Electrical professions

- Plant and Operations Technician
- Electrical and Building Services Technician
- Mechatronics Technician – Automation Technology
- Refrigeration Systems Technician

Installation Professions

- Installations and Building Services Technician – Heating Technology

New

Climate Protection Training Center

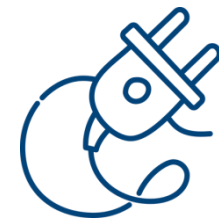

Training and continued education

Additional qualifications in the BBZ

Metal Technology

- Pneumatics/Hydraulics
- Metal Assistant
- CAD Inventor
- CAD Project incl. Prototyping
- CNC/CAD
- CAM

Electrical Engineering

- Renewable Energy
- Automation Technology
- KNX-Building Technology
- Electrical Training for Non-Electricians
- Network Technology
- Industrial Robots

Commercial Sector

- Accounting BEWIG Certificate „b*fin01“
- Certified Specialist in Cost Accounting b*con01

Welding

- Gas Melting Welding
- Arc Welding
- Gas Shielded Welding: TIG, MIG, MAG
- Welding Assistant

Climate Protection Training Center

Our strengths

Accommodation

- Participants with a long commute or difficult living situation have the opportunity to stay at BFI NÖ during their training

Catering

- The in-house cafeteria provides all participants with breakfast, lunch, and dinner
- All food items are sourced locally and/or organic

Childcare

- To support parents in their training and continued education at BFI NÖ, childcare is available in the kindergartens of the municipality of Sigmundsherberg
- The organization is handled by BFI NÖ

Coaching

- Our course participants are supported by our social pedagogue through coaching and learning training in all areas

Climate Protection Training Center

Training with perspective

- At the Climate Protection Training Center, the existing training offers for the „**Green Jobs**“ sector are being significantly expanded.
- Course participants have access to training in the fields of photovoltaics, installation and building technology and wind energy (renewable energy).
- In the new building complex, course participants have access to state-of-the-art training rooms for theory and practice, a well equipped workshop, and 10 new single rooms.

Climate Protection Training Center

Climate Info Point

Knowledge transfer

The Climate Info Point benefits not only our training and continued education programs but is also open to businesses, municipalities, schools, and external interested parties.

The Climate Info Point showcases the areas:

- Renewable Energies
- Ecology
- Energy Efficiency
- Environmental Building Technology
- Efficient Building Technology
- Climate Future
- Security Technology (Alarm Systems)
- Network Technology
- Sustainability
