

DC dVET Newsletter - July 2020

IN FOCUS

New Technologies and Dual VET

All over the world, skills requirements are changing more dynamically than ever. One key driver of this trend are the so-called new technologies. Robotics, blockchain technology, platform economy, 3D-printing, augmented and virtual reality are some of the instruments which will shape the future world of work.

Vocational Education and Training (VET) needs to respond to this development in order to keep relevant and effective. Because of its direct reference to practice, dual VET is particularly suited to play a pioneering role in this respect. In this newsletter, we shed light on the impact new technologies do and might have on dual VET in development cooperation.

Voices from the Field

For VET systems, keeping pace with new

technologies and the changing skills requirements is an opportunity and a challenge in one. How does the situation evolve in developing countries? How do DC dVET members address the topic in their VET projects? And how does COVID19 impact the general trend? Learn more about it in the following interview with ADA in Kosovo, the German Embassy in Pakistan, LED in Moldova and SDC in Honduras.

Interview

Teaching & Learning with New Technologies - Get an Insight into Tomorrow's VET!

New technologies not only influence professional curricula. They also have an impact on VET didactics. In the following video interviews, [Prof. Dr. Alberto Cattaneo \(SFIVET\)](#), [Michael Härtel \(BIBB\)](#) and [Dr. Alexander Schmölz \(öibf\)](#) provide you a taste of current trends and how VET might look like in the future. Don't miss it!

Trends

In what sense new technologies will change the way VET is provided?

Video 1

Opportunities

What is the potential added value of using new technologies in VET?

Video 2

Risks

What are the risks?
How to overcome them?

Video 3

Tools

What are promising VET tools, apps and platforms?

Video 4

Specific Resources

Please find [here](#) a listing of the projects, tools, platforms and studies mentioned in the video interviews.

NEWS & EVENTS

COVID19 – We Stay Committed!

COVID-19 also strongly affects international cooperation. DC dVET is committed to continue offering you its assistance by making use of webinars, videos, remote support etc. Please find below the link to the documentation of our recent webinars. To further engage with us, contact us at coordination@dcdualvet.org.

DC dVET Webinars

DC dVET recently hosted thematic webinars on the following topics: Key elements of dual VET, VET financing, cost-benefit analyses for companies, skills needs anticipation, financial incentives for companies - pros and cons. Have a look at the expert inputs and further relevant documentation.

COVID19 and VET - How do DC dVET Members React?

COVID-19 has required adjustments in VET organization and delivery all over the world. Under the following [link](#) you will find a summary of the measures taken by the DC dVET members. In the coming weeks, we will be sharing more approaches in the field on dual VET to overcome the COVID-19 crisis. Check out our [news website](#).

DC dVET - Who we Are

The Donor Committee for dual Vocational Education and Training (DC dVET) is a cooperation between ADA, BMZ, LED and SDC. Vocational education and training - including dual approaches - have always been an important pillar in the development cooperation of Austria, Germany, Liechtenstein and Switzerland. DC dVET aims at enabling an even better use of the existing expertise by bundling the know-how. The Committee supports its members and their VET project partners, promotes coordination between them and serves as a dual VET knowledge hub for a broader public (see [products and services](#)).

Please do not hesitate to forward this newsletter and / or contact us for more information or support: coordination@dcdualvet.org.
