

Society-driven Sustainability

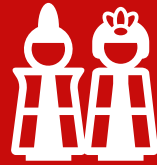

DC-dVET BarCamp

Niels RUMP KEK- CDC Zurich - Pully

23.01.2024

My
observations
My
questions

25 years SDC support to dVET
in Burkina Faso, ++ succes
= no sustainable changes???

30 years EU-CAP to support a
more sustainable agriculture
= no major changes

WHY?
HOW?
WHO?

WHY?

We are aiming
for systemic
changes:

- Change the way people act
- Change the way people interact
- Change the way people take decisions

Systems are
complex and
homeostatic

- VUCA
- Tend to keep an established equilibrium

HOW

Reality is a
construction

Reality is a
collective/social
construction

Change has to
happen within a
knowledge
network

WHO?

Complexity needs multiple and diverse perspectives to be addressed

Change in VUCA world needs multiple attempts (safe to fail)

Homeostasis needs incremental change, social learning, stakeholder involvement,...

NOW WHAT?

“Le balai citoyen” and the
“club Ciba” in Burkina Faso
2013

WHAT ABOUT YOU?

WHAT ARE YOUR
REFLEXIONS?

WHAT ARE YOUR
EXPEREINCES?

CAN YOU REPORT ANY
GOOD PRACTICES?
